

Name:

MEtaCloud

Tagline:

Welcome to MEtaCloud! Your ultimate cloud-storage browser and manager tool!

Description:

MEtaCloud links all of your cloud-drives and storage services in one convenient app! Just input your credentials for each cloud service that you currently subscribe to and MEtaCloud handles the rest. MEtaCloud displays all of your files and folders in a familiar user-friendly interface for easy and safe access to all your cloud data. No longer will you need to switch programs back and forth to keep track of all your data, MEtaCloud shows you where it is at all times.

Key functions:

- access all your cloud-subscription services with MEtaSync
- one, safe and secure login for all your cloud services
- displays all your files in a UI that mimics the user's operating system
- can download or upload files to each cloud service as needed
- drag and drop file handling, or full path configuration
- Github compatible
- premium users get 100 GB of cloud storage (free users get 10 GB)

Goals for the User:

- to provide the easiest and safest platform to access your cloud data
- to provide security for all your cloud data
- to provide easy offline access to your data
- to provide easy syncing of your data

App Users:

- Cloud Professionals
- Business Professionals
- Creative/Graphic Designers
- Students
- Families
- Anyone with multiple cloud-based drives

Similar Apps:
